REPUBLICAN NOMINATIONS.

CASPAR BUTZ, U. B. HAWLEY.

Later from Europe.

Italigence from Europe of a highly interng character will be found under our tele-

approaching election, STETI BOOKS WENTWORTH'S ATTEMPTS TO DE-PEAT THE WEST SIDE UNION

out a purpose, and that purpose always, has an intimate relation to his immedi-ate personal intensets. Some time ago a project was started for uniting a half dozen of our railroads in the construction of a Union

Depot on the West Side. It was very evident that such an union of railroad inter-

ests was feasible, that the enterprise, if carried out, would add largely to the business of

the West Side, that it would greatly increase

the value of real estate in that section, and

Depot from the beginning, and for various reasons. In the first place, he owns no stock in

but he does own stock in rival roads. It is for his interest, therefore, to defeat the project

on his account. In the next place, the bulk of Wentworth's real-estate is in the South Di-vision of the city. A Union Depot on the West Side would greatly increase business there, as well as add much to the value of real

estate; but it would add nothing to the value

of Wentworth's property in the South Division. Indeed, it is said, that Wentworth believes this

West side Union Depot will depreciate the value of his large tracts of land in South Chi-

cage. He wants all the railroads to come to the South Division, no matter from what direc-

tion they approach the city. He wants all the depots to be built in the South Division, so

If Wentworth's influence were as powerf

in Chicago as it once was, the people of the West and North Divisions could not do better than to donate to him a valuable real-estate in-

torest in those parts of the city. If he own

an eighty acre lot in the west Division, h would doubtless believe it would gain as mucl in value by a Union Depot on the West Side

as his eighty acres in the South Division would

lose by it; and of course his opposition would cease. If he owned an eighty acre lot in

North Chicago, he would not at any time wage

that certain legislation was necessary to enable the roads to get to a Union depot, and this

legislation he intended to defeat. His opposi-tion to the election of Mr. Peck was not owing

so much to his personal hatred of that gentle-man, as to the fact that he would be in the way of the scheme to kill off the West Side Union

Depôt in the Legislature; but he sought to

sure the building of the West Side Union De-

pot. His opposition to the law is merely a pretence; it is the creature of the law—the

West Side Union Depot—that he is after. The former can do him no mischief, while the com-pletion of the latter, he believes—though very

foolishly-will detract from the value of i

g of the foregoing facts, we give place to the

West Side Union Bepot. It was introduced by Mr. Peck and its passage arged, at our earnest solicitation, and in pursuance of his pledge, given us and others as West Side property holders, that he would, if elected, procure such a law. Usa not Mr. Peck attended to the interests of his West Side constituents in this particular, they would have had just cause of complaint against him; and any insimusations of improper intentions or objects, in the passage of that law, are entirely unwarranted by facts.

But why does Wentworth connect the nam

But why does Wentworth connect the name of Mr. Judd with the passage of this law, and remain silent as to the other members of the Cook County delegation who voted for it? Simply for this reason: Wentworth has the vanity to suppose that he and Judd are riyals, and that if he could get Judd out of the way he would have plain saling. He wants to make Republicans outside of Cook county believe, that if Judd were to get the nomination for a costain office which he (Wentworth) desires, the tall gentleman would belt. The estimate in which Mr.

man would bolt. The estimate in which M

Judd is held by Republicans throughout the State secures him harmless against attacks from that quarter; and Westworth does not

dare to bolt. Let him go on with his maps and while his hand is in, let him give one of

the "three-hundred-acre Park" and of his an Senator Douglas' contiguous property, and ex

plain the motives which led him to unite with Douglas to secure the passage of the park act, which, had it not been repealed by the men he

is now abusing, would have cost the people of South Chicago from one to three millions of

A DAY AFTER THE PAIR,
The Times uses the name of EDENEZZI
PECK, Esq., as an independent candidate for

Judge of the Superior Court, without his au-thority, and in defiance of his wishes. Mr. PECK stated to one of the editors of this paper,

just before he left the city, that he could no consent to become a candidate; his sons who

are here and know his wishes and inte

tions, say that he is not a candidate; all hi immediate friends and acquaintances say tha

he is not a candidate, and if he were here, he would have no hesitation in saying so himself. Hence the Times' announcement is false—a

dodge to keep up a show of opposition to t

Republican nominees until such time as the strength of the Democracy can be rallied upon a full Democratic ticket. The deceit comes too late. The election of Higgins and Goodrich, Butz and Hawley has been decreed.

Mr. C. BECKWITH authorizes us to say tha

date for Judge of the Superior Court under any circumstances; and furthermore, that he will

not accept the office if by any chance he shoul

happen to be elected. Mr. Beckwith states that the editors of the Times have all along

een aware of this fact, and that they wer

pecially made aware of it on Tuesday last, th lay previous to the announcement in that shee that he would be a candidate. Mr. B. does

ecord his determination not to run. In this

the public will agree with him. The cond

of the Times in the premises is explained in the fact that Mr. Beckwith was opposed to the late Lecompton charter. He called it by its

pointment. His letter, written last fall to Beaglas, presents an insurmountable objection. But the Times says that "though politics have gradually become mixed up with judicial elections in other States, our own happy State of Illinois has thus far been exempt from the diagraceful represch." This is decidedly cool. How happens it, that in every county, circuit or district in this State, where the Democratic party is in the ascendant, Democratic partizans are snugly scated upon the beach? We recollect that a few years ago Judge Logan, an old Waig and a very able lawyer and jurist, and perhaps the ablest in the State, ran for Justice of the Supreme Court of this State, in tice of the Supreme Court of this State, in middle district, against Mr. Skinner, a De-rat, a very weak man and a very inferior is "happy Illinois," seconding to the Times, politics has never invaded the sanctity of our Judiciary, for the reason that none of their managery, for the present true, and the summariate duges were brought forward and minated by Democratic cancuses and contions. But what is the difference, whether Democratic parties is elevated to the Bench rough the spontaneous and irrevular action ion of the party? If there be any difference, he latter course is preferable as tending to ring forward botter men.

and the father held to bail in \$5,000 for trial at the next term of Court.

The appearance of the prisoners in court, is described as follows:

The Doctor (John Doy) is a bright eyed, alimply built man, with a thin face and heavy, dark board and whiskers. He is apparently about forty five years old, is very quiet in his demeanor, and takes notes of the case as it proceeds. Charles Doy, somewhat heavier than his father, is a young man of twenty-tree, with iten, flowing hair, and a thin monstache and whiskers. Like his father, he is unobtrusive in deportment, listening quietly, and apparently without excitement.

should be, but when the aforesaid element of discord shall have ceased to stand between us and the pro-sistery party-when the battle is narrowed down to its merits as between Republicanism and Dred Scottism—we shall give five thousand majority for Freedom every time.

The Congressional fight is going on with more determination than I ever knew before in Connecticut. We feel that the syst of the country is in our hands. The list (Hariford) District is in my opinion the only doubtful one in the State. You are already aware that Err Clark, Jr., having very properly failed of a renomination, is now running as a distinctive American candidate in opposition to Hon. Dwight Loomis, the Republican nomines. Clark is of course trying to elect Aivin P. Hyds, the Border Rufflan candidate. He cannot get over two hundred votes in the District for himself, but he hopes to draw a sweet larger number sway from Loomis, and thus leave a hole for the Dred Scott candidate to crawl through. Mr. Loomis' friends say he will be elected by three hundred majority. I believe he will be comed to the Dred Scott candidate to crawl through. Mr. Loomis' friends say he will be elected by three hundred majority. I believe he will be comed that Hen. John Woodruff will be elected over Sam Arnold (Doughface) by four or five hundred majority. The opposition to Woodruff in the Republican ranks caused immediately after the somination. He is the most popiliar man in the District by

The trial of Dr. Doy and Son on a charge of enticing alares from the State commenced at St. Joseph, Mo., on the 25th instant—a change of venue having been granted from Platte City. The counsel for the State were J. M. Bassett, District Attorney; Sillas Woodson of St. Joseph. W. H. Miller of Platte; J. R. Boyd of St. Joseph. W. H. Miller of Platte; J. R. Boyd of St. Joseph. The counsel for the defense were A. C. Davis, Attorney General of Kansas; Ex-Governor Shannon of Lecompton; James Spratt of Platte county, Mo.

The St. Louis Democrat brings a report of the first days proceedings. The defendants were indicted jointly but a severance was granted, and they were tried separately—the case of the father coming on first. The jurymen were all residents of St. Joseph and vicinity, and are naid to be fair men.

trimest support to Mr. Burnham and refused qualifiedly to be a candidate himself. The esentation of his name therefore, is wholly authorized, and the enemies of Mr. Burnham we undoubtedly taken selvantage of his ab-nee to make him a participal criminis. Mr. ratins' reason for the course he is taking is at he was personally and grossly traduced by the friends of Mr. Burnham before the nomina-tion. He also alleges that Burnham is not a Republican, but this is a mere subterfuge and pretext for bolting. Burnham was Speaker of the House in our late Legislature and made a good presiding officer. He is a fine public speaker and altogether a man of decided ability. He will do honor to Connecticut in Congress. O.S. Ferry is the Republican candidate in the IVia (Bridgeport) District, and will be elected be from five to eight hundred over Wm. D. Hishop, Lecomptonite. Mr. Ferry is one of the first given in the State, and will rank with the ablest representatives Connection has ever sent

Is is estirely and therefore, to calculate on three Republicans from Connecticut in the next Congress. If the fourth is lost the whole responsibility rests on Exra Clark and his disorganizers in the Hartford District. If we send Loomis, Woodruff, Burnham and Ferry to Washington next winter; it will be the ablest delegation we have had in many years. Senators Hamlin and Wilson, Mr. Grow, Mr. Rurlingame, Horace Greeley, and other distinguished speakers have apposituated in the control of the control

The Forest Queen arrived last evening, with quite a load of passengers and freight. On board the Queen were Benjamin and James Johnson, two young men from Sault St. Marie, with the mail. When they left the Sault on the 14th, it had been raining almost constantly for six or seven days. The rain had a telling effect upon the ies, which was melting vary rapidly. In the river above the canal, as far as Whisky and Tequamenan Bays, the ice was not over five inches in thickness, with about ten inches of water on top. The day before the Johnsons started, Mr. Church arrived from his residence on Sugar Island, fourteen miles below the Sault, and stated that the ice was giving way rapidly, there being themy open places, and he expected to be able in a few days to reach the Sault with his hig sall boat.

OUTRAGEOUS VANDALISM.—On Sunday aight one of the most outrageous acts was perpetrated, of the character, that we ever heard of. How To Rans Early Toxavoss.—About the lat of April, take a few large turnips and cut out the hearts of them to form a sort of cup. Fill the cavities with earth, and plant two or three tomato seeds in each. When the seeds have well sprouted, pull up all but the heathiest plant in each turnip, and let those that remain stand where they will have the benefit of the usu; the plant will grow very thrifty—the decaying turnips furnishing its food. When the weather becomes sufficiently warm, set the turning in a well-prepared soil, hot less than three feet apart, make lath frames to keep the vines from the ground, and keep the soil well hilled up around them, and you will have a crop that will astonish the nairies. The advantage consists in getting the plants started early without setting them back by transplanting.—Plattadary Republices.

Taxing and Oarn with Eloven Hand, —A good deal has been said lately in England, upon the decision of Mr. Baron Framwell, at the last Liverpool assises, touching the form of taking an oath. The learned Baron ruled that there was no law or obligation to take off the glove when a cath was taken, and he accordingly received an oath from a person who held the Bible in a gloved hand. In the Insolvent Dectors Court, on the 2d inst; a similar case turned up; and Mr. Commissioner Murphy, who presided, asid he was sware of the decision of Mr. Baron Bramwell, but he though it better to albert to the old custom, as the touch of the Holy Book was, in his opinion, to be by the naked hand, and they all knew that when the knights were sworn they always took off their gauntlets. I had now reached the new capital of "that Westers World," as Washington described it, which Penn prophesied would yet make a glorious country. The Valley of the Mississpip above Cairo, comprising on its eastern banks Illinois and Wisconsin, and on the west Miscouri, lows and Minnesota, embraces probably the greatest tract of fevtile land on the surface oner, Iowa and Minnesota, embraces probably the greatest tract of festile land on the surface of the globe. In total extent it exceeds England and France together, with the kingdom of the Two Sicilies thrown into the bargain—it is more than equal to Frussia and the whole Austran empire—wen Spain and Turkey combined would require the territory of the Ionian Islands to place them on a par with it. And this wast territory is not only intersected by numerous lines of railroad, while give it direct access to the streat, New York and Philadelphia, but on the territory of the Ionian Islands. However, it is not only intersected by numerous lines of railroad, while give it direct access to the streat, New York and Philadelphia, but on the streat, and the St. Lawrent, and on the south by the Mississippi River, it and on the south by the Mississippi River, it and on the south by the Mississippi River, it and on the south by the Mississippi River, it and the list of the grain trade of Chicago. An Indian village in 1850, this place has become a great city with upwards of 120,000 people, with warves and granaries for miles along the river canal which opens into Lake Michigan, and streets, public buildings, churches, and private dwellings that may vie with those of Loudon itself. The stores on the principal streets are equal in size and architectural elegance to the new row of fine buildings which leads from Canon street into 8t. Panl's Church Yard. There are numerous stands for backney-coaches, and various lines of omnibuses ply along the streets. And Chicago she actually the center of more miles of railway completed and in operation, than London. Yet it is only twenty years since the first ablpment of some forty bags of wheat was made from it. In 1847 they shad reached 2248,000 buildes, and in 1857 upward of 18,000,000 bushels. Chicago and all its weak made from it. In 1847 they sand in 1857 upward of 18,000,000 bushels. Chicago and all first was make from the principal streets are believed to be give to reason of its surfa Sewing Machines. RAYMOND'S LATEST IM-FAMILY SEWING MACHINE. From De Soto to the southern boundary of the State, the country is all hills and hollows rocky and wooded, with good farms interspersed. The climate is very mild in winter and hot in summer, and admits of the growth of all kinds of fruits and tobacco. It produces white wheat of the finest quality, and peaches and other fruits are sent in large quantities for the supply of the market at Chicago. This is one of the sarliest soils in the Union for the ripening of wheat, the new crop from which may be sent to the Northern and Eastern markets before their own harrests are ready. CONSUMPTION & CHRONIC DOCTORS BEADING & MEAD wheat, the new crop from which may be sent the Northern and Eastern markets before the own harvests are ready.

I now retraced my course by the same line is the junction at Centralia, but went northwar from that point by another line, nearly throng the centre of the State, meeting with the same characteristics of soil as were noticed on the journey southward. Near Tacusach there is another considerable settlement of French Canadians from Lower Canadia. On again reaching the black prairie, after having been for som into accustomed to the whitish gray soil of the southern prairie, it seemed to me that the land looked richer and the grass greener. But we were now traversing the richest part of Illinois, and for 100 miles north of Tacusah the whole country is very fine, much of it settled and enclosed, and dotted with houses, as far as the eye can see. The cultivation is on a larger and more regular seale, the Indian corn and wheat both showing cridence of more careful management. Hay and corn ricks are more numerous. Woodland is to be seen in all directions, and the country is altogether more undulating, rich, and picturesque, than any part of the prairie which I had yet seen. At Bloomington, which is a very rising town, with 7,000 people, 10,000 bashels of grain are sest off daily by railroad to Chicago in a good season. The yountry here is chelly settled by farmers from be State of New York. About thirty miles archer north near the station of Minoia, a large stoin of about 200 families from Vermont have estied. They sent before shem a committee of UNGS, HEART and LIVER, FEMALE DERANGE-MENTS, and all CHRONIC DINEASES. REMOVAL.—C. C. Gaiena is the great seat of the lead mines in America, and yields annually about thirty million pounds weight. It is a large and thriving town, situated on the hanks of Pever River, which is navigable to the Mississippi, some few miles distant. The river smelt motionsly at night, and the principal trading streets lie along its bank. But the residences of the people are presently scattered up the hill-sides on both banks, and the inhabitants themselves, notwith-standing the ominous name of the river, think there are few places in the State to compare with the town of Galena. From Gaiena to Dunieth on the Missiashppi, and near the northwest boundary of Illinois, the country has no interest of importance to the farmer. It is chiefly woodland, and where, open prairie, it is already "actiled" and under cultivation. the original of the following rather amusing legal document, says the Boston Journal, we are indebted to Mr. Edward ; Warner, who is con-LISENT E.
